DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 24 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. There are no phosphates claimed in claim 16, the claim claims 24 and 25 depend from.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over El-Hibri et al. 5,164,466 or El-Hibri et al. 6,329,493, in view of Imperial Chemical Industries Ltd. GB 1,398,133, Militskova et al. SU 952,923 or Solvay Advanced Polymers WO 03/089520.
6. El-Hibri et al. ('164) disclose applicants' blend of polysulfones in the Abstract and claims 1-8. Thermal stabilizers are shown in column 6, lines 44-46. El-Hibri et al. ('493) teach the same blend in the Abstract and claims 1-8 and 11-12. Thermal stabilizers are shown in column 6, line 57-60. ICI recites at least one polysulfone, including applicants'

ingredients and phosphite stabilizers in claims 1-14. The Soviet patent reveals a polysulfone and a phosphite ester which improves the flow properties of the compound. See claims 1-4 the Abstract. Solvay, which is in English and designates the U.S., presents polysulfones in claim 1 and phosphites and phosphonites in claim 11. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to use the stabilizers of the secondary references to improve the heat stability of the compositions of the primary references, especially since they improve the flow properties too.
